

Specialist shear blade manufacturer
for the glass container
and tableware industry
worldwide

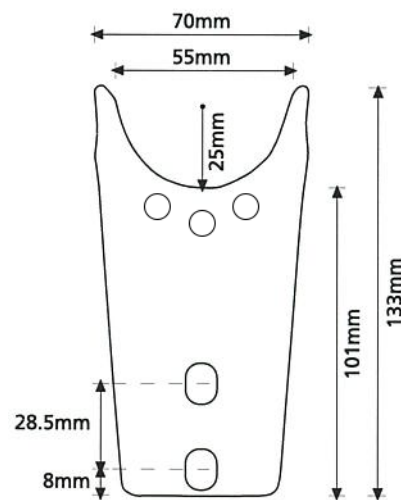

Each shear blade is manufactured from 1.5mm high speed steel and precision ground at 3° around the top cutting edge. They are all checked for centre height and accuracy and supplied in matching pairs, they will be packed in sets of three or four for triple or quadruple operation if requested.

Small "V" Dimensions

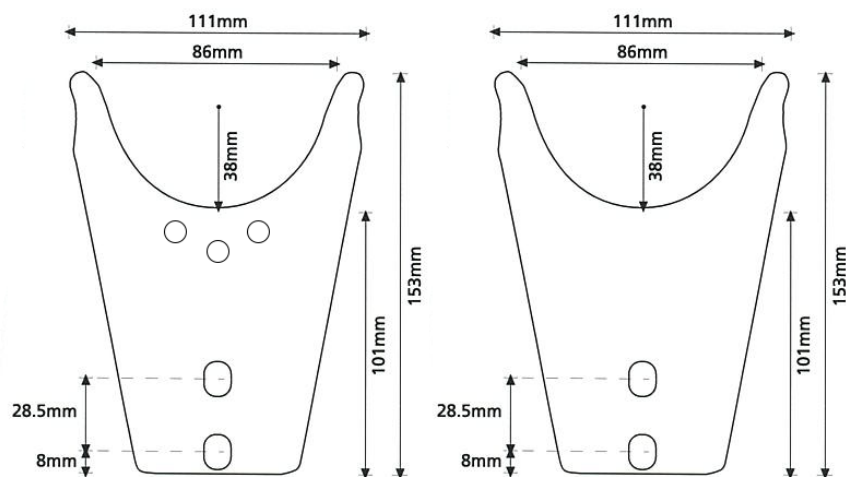

GSS-202A

GSS-202A-CH

This enables rapid setting of the blades when jigging and only minimum tension required when cutting, thus giving an extended blade life and helping eliminate shear marks whilst maintaining coolant fluids to a minimum. The set of blades should be fitted on the same arm for maximum benefit.

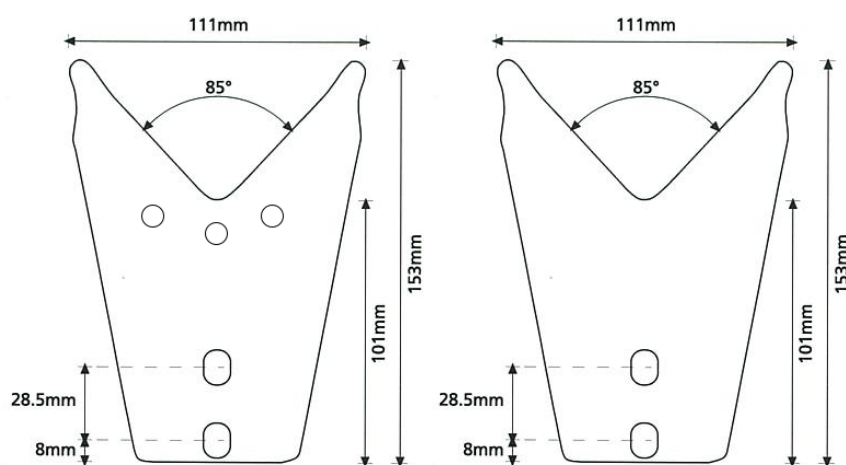

Large Radius Dimensions
